

BALANCED SOLUTIONS.  
SOLID SYSTEM.  
MAXIMUM ROI.  
**SUCCESS.**

Our ultimate goal is to fully equip, enable and train your staff as quickly and efficiently as possible with everything needed to manage projects successfully on their own, without the continual use and expense of outsourced professional services. However, if desired, our consultants can provide mentoring support and staff augmentation on a long-term basis, so you can maintain consistency and confirm that your entire staff retains complete understanding of your project management system. We work within your requirements to implement a system that works for you, and we provide the level of service that's certain to maximize your project knowledge and ensure lucrative project success.

#### Our Consulting Process

##### Plan.

We start by getting a firm understanding of your expectations and success. We help you define a measurable baseline and identify assumptions and constraints, while also assessing the members of your project team and ours.

##### Design.

We design application structure, review/revise processes, create/document process flow, and design data security and backup procedures. We also begin training your core team and testing the designed solution in accordance with an acceptance test procedure that you approve.

##### Enable.

Your internal team works with us to build in-house expertise on your new solution. We provide standard certified training or customized training incorporating processes with the product basics. We also validate the design in production mode, mentor key personnel, and evaluate the resulting system.

##### Support.

We mentor on process and product to ensure your return on investment. We continue our working relationship with you to provide technical assistance with product upgrades, revisions for database structures or processes, integration support between your new system and your existing systems, and additional customized training.

**CONSULTING PROVIDES  
A TOTAL END TO END SOLUTION.**

### ORACLE | PRIMAVERA PROJECT MANAGEMENT

Oracle's Primavera is focused exclusively on helping project-intensive businesses manage their entire project portfolio lifecycle, including projects of all sizes. It is estimated that projects totaling more than \$6 trillion in value have been managed with Primavera products. Companies turn to Primavera project portfolio management solutions to help them make better portfolio management decisions, evaluate the risks and rewards associated with projects, and determine whether there are sufficient resources with the right skills to accomplish the work. These best-in-class solutions provide the project execution and control capabilities needed to successfully deliver projects on time, within budget and with the intended quality and design.

Oracle's Primavera Project Portfolio Management is the world's leading project, portfolio and resource management software. With Primavera, you get industry-specific solutions that help create a competitive advantage. Oracle's Primavera software delivers tangible results for companies and projects of all sizes – across your organization and around the world.

### IMAGETOOL DOCUMENT MANAGEMENT

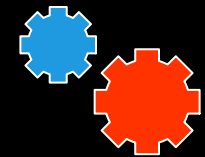

Whether you're managing documentation for a project, department or entire organization, ImageTool offers several products designed to fit every level of document management need within your organization.

can continue to operate in the event of a disaster.

With ImageTool, you will increase efficiency within your organization, save money through reduced office/storage space, secure critical information, adhere to government regulations regarding retention of and access to documents, improve communication between employees, outside resources and customers, and ensure your business

### CUSTOM SOLUTIONS

A system that points everyone to your core business strategies keeps everyone working toward the same profitable goals. It also fosters quality employees who are able to perform their job efficiently, often reducing expensive employee turnover. We carefully adapt the appropriate level of services you need us to provide based on your company's current level of project management maturity.

### POWERFUL TOOLS = POWERFUL KNOWLEDGE

With the power of project knowledge, your profits are unlimited. For most companies, a small investment in a professional project management or project control system implementation pays for itself soon afterward. You'll quickly realize dramatic savings in time, employee hours, and expenses. Plus, your savings are repeated with every project! Imagine the exponential effects on revenue from such a solution.

### PROFESSIONAL TRAINING

The Evans Technology Institute is an Authorized Primavera Training Center. We have provided project management training for some of the world's most successful companies. All of our instructors are Primavera certified. Our training courses are held in our state-of-the-art training facilities in Atlanta and Orlando where we provide hands-on training and individual attention. Our instructors are also available for on-site training and can customize classes to meet your specific needs.
